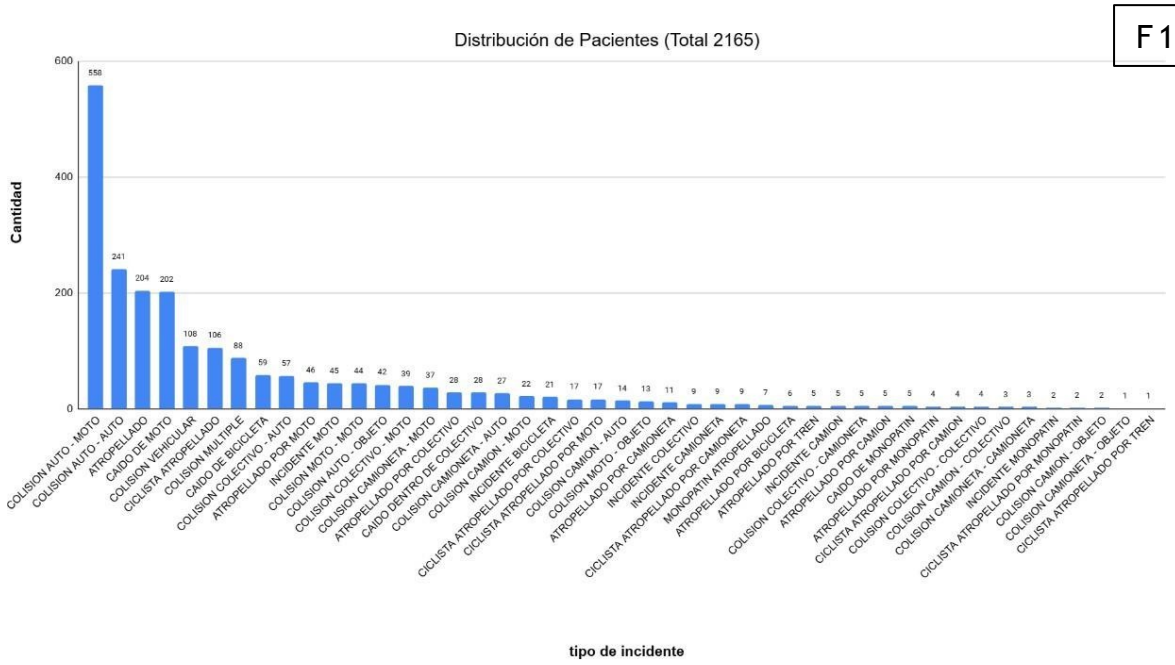
TRAFFIC INCIDENTS OCTOBER 2025

In October 2025, a total of 1882 requests for assistance due to traffic incidents were registered. Resulting from these incidents, a total of 2165 patients were treated.

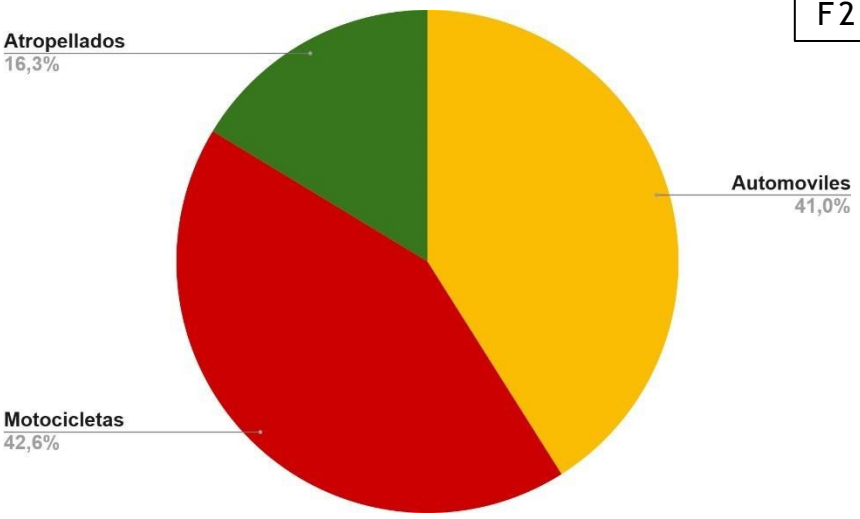
The most frequent type of incident corresponds to Car-Motorcycle collisions (25.77%), followed by car-car collisions (11.13%) and pedestrian accidents (9.42%); the fourth position is occupied by motorcycle falls (9.33%). (Figure 1)

F1



Of the total incidents registered, those involving motorcycles correspond to 1010 cases (42.6%), those involving automobiles represent 972 cases (41.0%), and pedestrian accidents represent 387 cases (16.3%). (Figure 2)

F2



INCIDENT FREQUENCY ACCORDING TO DAY-TIME

The highest average occurrence of traffic incidents was observed on Wednesdays between 13:00 and 17:00 (1:00 PM and 5:00 PM). The highest number of incidents during Wednesdays in this time slot may be due to characteristics specific to the population dynamics during the month of October.

These data represent averages calculated from the monthly data, considering the variables day of the week, time of day, and number of incidents. (Figure 3)
